

# AerO<sup>3</sup>Pyramid

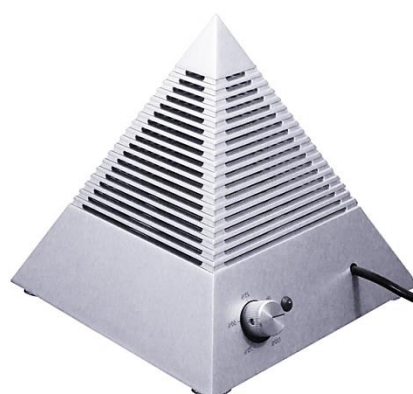

Universal useable Air Purifier

The Miracle of the Pyramid is – as often – a Miracle of the Nature. But the natural process of the air purification doesn't work everywhere adequate. Mostly in closed rooms, where the air pollution via microbes, bacteria and odour is very high, are the health and well-being in danger.

In this case the AerO<sup>3</sup>Pyramid comes to usage with an appreciable result: healthy and clear air! And this happens invisibly and soundlessly. Based on the scientifically principle of Air purification: Inactivation of osmogenes (the odour molecules) and microorganism trough oxidation and oxygen ions. This may sound complicated but in the praxis it's very simple. You only need to plug in the connector and within a short time period you will notice the refreshing effect.

The AerO<sup>3</sup>Pyramid is a universal small device for the spontaneous and continuous usage. Don't get fooled by its small size. The AerO<sup>3</sup>Pyramid is very powerful and scores the best effect if it's placed near a possible emission source. Through the sensor technology the room air will be measured by its load factor to rule the effort automatically. The optional effect is guaranteed. And for sure it looks beautiful.

- Sensor-controlled
- Change lamps after 17.000 hours of operation or every three years
- Maintenance operation: depending on the pollution clean the special lamps once per year
- Operates without chemicals and replacement filter
- No regular refilling
- Low cost
- Low operation cost
- Easy installation: deploy it, plug in the power plug, done!
- CE certificated
